

A Web-Based Utility Assessment and Analysis Tool

Key Features

- Business Process Effectiveness
- Organizational Focus and Alignment
- Infrastructure Evaluation
- Industry Best Practices
- Financial Performance
- Management Practices
- Technology Readiness
- Customer Insights

For Utility Self-Assessments – Use the Right Tool

Utiliworks Insight™ is a performance improvement tool for water and electric utilities. Insight™ utilizes web-based technology and a set of established “industry best practices” to assist the utility in learning about their current reality related to infrastructure, processes and behaviors.

Designed by Utiliworks Consulting, Utiliworks Insight™ integrates over 20 years of industry knowledge and management expertise. Insight™ operates on the Neurametrics platform—a powerful analysis and data presentation engine.

Break Down Barriers for Improved Communication

Utiliworks Insight reveals behavioral data from the web-based surveys that are taken by an audience of executives, managers and front line personnel. A unique software engine is used to interpret and present the data, allowing utilities to:

- Evaluate performance
- Determine improvement opportunities
- Identify long-term business risks
- Understand specific performance gaps
- Recognize workforce productivity based on direct employee input

... Resulting in major cost savings and improved performance

Utiliworks Insight™

To Find the Answers You Need – Ask the Right Questions

A web-based survey is taken by the utility-selected group of employees and customers. The survey is recorded anonymously to encourage honest and accurate responses.

Inputs

Behaviors
Standards
Best Practices
Processes

Outputs

Dashboards
Performance Gaps
Demographic Sort
Multifaceted Analysis

Revealing Root Causes and Advancing Performance

After all the participants have completed the survey, a sophisticated report engine is used to interpret the data. A dynamic presentation using an array of user-friendly charts, graphs and other forums is automatically produced from the survey results. Utiliworks Insight™ offers tactful feedback in an easy-to-read format to reveal the utility's strengths and determine root causes.

Utiliworks Consulting is a professional services company that helps utility clients assess, design, procure and deploy advanced metering systems and smart grid technologies. Our processes, people and analysis tool, UW Insight™ will lower your utility's AML and smart grid project risk while promoting positive developments. Build your utility's smart solution with Utiliworks.
