

**Seeking a GROWING company?
Eager to shine in a small, flexible and adaptable organization?
Desire BIG company benefits?**

If so, we need to talk!...

Located in Baton Rouge, LA, we are a meter reading technology company, focused on the successful development and deployment of Advanced Metering Infrastructure (AMI) technology and Smart Grid technology. We assist utility clients in deploying systems that will capture and utilize data more effectively and use that information to improve the performance of their business.

This is a high-growth industry. As a result, we are seeking qualified candidates focused on finding a challenging and stable opportunity associated with a newly-developing company focused on municipalities and investor-owned utilities (water, electric, and gas) throughout the U.S. and Canada. If you are ready to join our growing team, this may be the ideal opportunity for you!.

Senior Business Analyst

Utiliworks Consulting, a leader in the implementation and deployment of Smart Metering (AMI) Infrastructure is actively searching for a Project Manager to manage meter deployment projects nationwide. In this role you will be accountable to provide business and technical expertise to support project management, business change management and process improvements related to Smart Grid and Automated Metering Infrastructure implementations. The successful candidate will be able to communicate effectively to all levels within a utility organization and manage client expectations to ensure customer satisfaction.

Job Description:

The Senior Business Analyst supports business change management by:

- Establishing clear lines of communication to key stakeholders for input and effective alignment.
- Facilitating effective change management sessions.

The Senior Business Analyst supports business process improvements by:

- Scheduling and planning business process workshop facilitation
- Producing business process maps
- Developing functional business requirements
- Ensuring traceability of project scope and functional requirements to technical requirements
- Conducting gap analyses of final technology solutions against both

functional and technical requirements

The Senior Business Analyst supports project management by:

- Collecting and maintaining data for the Project work stream plan
- Validating required reports
- Assisting with maintenance, tracking and resolution of issues and action items
- Collecting and maintaining project plan and schedule data, working in conjunction with Project Scheduler
- Elevating risk triggers to Project Manager
- Updating and maintaining living documents
- Assisting with QA, test planning, test execution and resolution of defects found
- Coordinating technical dependencies with other work streams

Required Qualifications:

- 10% Business Process Management
- 15% Stakeholder Management
- 15% Change Management
- 35% Analysis and Design Support
- 25% Project Management Support
- Bachelor's degree or equivalent experience.
- 5 to 7 years of job related experience.
- Demonstrated Solid written communication and documentation skills.
- Demonstrated experience working with complex projects.
- Demonstrated communications skills to multiple management levels.
- Demonstrated project software experience; MS Office/VISIO.

Benefits:

- Competitive salary
- Incentive plan
- Paid time off
- Medical, dental and vision benefits coverage
- Employee Assistance Program through Optum Care 24
- Challenging work and the potential for career advancement
- An environment where respect, satisfaction and hard work are valued!
